

Examiner-Initiated Interview Summary	Application No. 10/600,749	Applicant(s) SUGAYA, SHIGERU	
	Examiner BLANCHE WONG	Art Unit 2419	

All Participants:

(1) BLANCHE WONG.

(2) Lawrence E. Russ (Reg No. 35,342).

Date of Interview: 23 September 2009

Status of Application: _____

(3) _____.

(4) _____.

Time: _____

Type of Interview:

☒ Telephonic

☐ Video Conference

☐ Personal (Copy given to: ☐ Applicant ☐ Applicant's representative)

Exhibit Shown or Demonstrated: ☐ Yes ☐ No

If Yes, provide a brief description: _____.

Part I.

Rejection(s) discussed:

Claims discussed:

14, 16

Prior art documents discussed:

Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

See Continuation Sheet

Part III.

☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.

☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: Re: claim 14, 1) "the beacon information receiving range" in line 19 should be "the predetermined beacon information receiving range"; 2) if "a predetermined time in the predetermined beacon information receiving range", then the term "range" is actually a time period or interval; and 3) whether "range" is time period or interval, "beacon information receiving means ... located in a predetermined beacon information receiving range" in lines 5-8 does not make sense. Re: claim 16, the amendment mostly repeats the interference information means limitation and adds only "a management time slot" that is non-descriptive. Specification, p.23, discloses "the management time slot M temporarily provide a buffer superframe 523 so as to establish a neighbor piconet relationship". See Also a management time slot and superframes in Fig. 5. .
